

LINKING RESOURCES

Connecting places. Creating possibilities.

We bring banks and property partners together — creating convenient banking facilities where people live, work and shop.

ATM / CDM / CRM

SELF-SERVICE TERMINALS

FOR PROPERTY PARTNERS

Your property. More possibilities.

Turn a suitable space into a convenient banking touchpoint for your visitors, residents and employees. ECOMS assesses the site, connects the banking partner and coordinates the placement.

01 / PROPERTY PARTNERSHIPS

You provide the space. We coordinate the rest.

Our host-site programme carries no installation, rental or service charge to the host under the agreed arrangement. Banking and cash-handling responsibilities stay with the bank and its authorized providers.

Offices & industrial sites

07

Superstores & restaurants

08

Wholesale & commercial markets

PLACEMENT FORMATS

Indoor lobby / Temperature-controlled vestibule / Outdoor booth / Drive-through location

OUR SOLUTIONS

A complete approach. Three powerful formats.

Choose the format that fits your network, catchment and operational requirements. We coordinate the physical deployment; your bank retains control of banking operations.

01

Offsite ATM, CDM & CRM

Identify, assess and secure high-potential locations for self-service banking, with layouts and access aligned to bank requirements.

- Location assessment & acquisition
- Kiosks, booths & vestibules
- Installation coordination & site liaison

Discuss SST placement

02

Turnkey Digital Hubs

A complete banking space in cash-intensive markets, bringing property, fit-out and physical operations into one agreed monthly structure.

- Shop sourcing & landlord coordination
- Fit-out, cooling & power backup
- CCTV, cleaning & site upkeep

Explore the hub model

03

Dedicated business CDMs

On-premises deposit access for bottlers, distributors and other cash-intensive businesses, arranged with a banking partner.

- Exclusive business use
- Real-time credit where bank enabled
- Less reliance on branch visits

Explore dedicated CDMs

TURNKEY DIGITAL HUBS

Bank-ready. From the ground up.

Bring self-service banking closer to merchants in wholesale, retail and industrial catchments. A compact ATM/CDM lobby or a larger assisted hub can be configured around the bank's approved layout.

ECOMS MANAGES

The physical banking space

Location sourcing, landlord negotiations, civil and electrical works, branding readiness, air-conditioning, agreed backup, CCTV installation, housekeeping and site maintenance.

THE BANK CONTROLS

The banking operation

Terminal selection, connectivity, cash management, transaction processing, customer accounts, compliance and banking security protocols.

Scope, equipment ownership, operating hours and commercial terms are agreed for each deployment.

FOR CASH-INTENSIVE BUSINESSES

On-premises cash deposits.

A dedicated, bank-approved CDM helps distribution teams deposit cash without repeated branch trips. Deployment is subject to bank feasibility, approvals and site suitability.

24/7 access

Deposit beyond branch hours, where supported by the approved setup.

Reduced cash movement

Less staff travel, transport effort and exposure during branch visits.

Immediate account credit

Bank-enabled processing supports faster access to deposited funds.

No host deployment charge

ECOMS and the banking partner manage agreed deployment and operating costs.

HOW WE WORK

One partner. Every step.

01

Assess

Review catchment, access, visibility, space and transaction potential.

02

Secure

Coordinate approvals, property terms and the deployment scope.

03

Prepare

Deliver the agreed fit-out, utilities and bank-ready infrastructure.

04

Support

Coordinate commissioning, site upkeep and ongoing landlord liaison.

ABOUT ECOMS

Local knowledge. Lasting connections.

ECOMS has specialized in strategic offsite banking locations in Pakistan since 2006. Our work connects banks with property partners and brings the infrastructure, coordination and ongoing support needed to make those locations operational.

We assess each site for customer flow, visibility, security, access and long-term suitability, then tailor the physical setup to the bank's requirements.

OUR CLIENTS & PARTNERS

Connections across banks and places.

PARTNERSHIP QUESTIONS

The details that matter.

Who manages cash and banking transactions?

The bank and its authorized providers manage cash, transaction processing, accounts, reconciliation and banking compliance. ECOMS coordinates the location and agreed physical infrastructure.

Can ECOMS work with a location our bank has already selected?

Yes. Discuss your existing location with our team so we can agree the infrastructure, site-readiness and ongoing support services required.

What is included in a turnkey Digital Hub?

The agreed package can include rent, landlord coordination, fit-out, electricity, air-conditioning, power backup, CCTV installation, housekeeping and site maintenance. Terminal provision and connectivity responsibilities are confirmed separately.

Does a host property pay for SST deployment?

Under the host-site programme, no installation, rental or service charge is payable by the host for the offered banking facility. Approved space, access, power and environmental requirements are agreed before deployment.

Are all sites open 24 hours?

Hours depend on the location, landlord rules and the bank's security approval. Extended or 24-hour access is arranged where permitted and suitable.
